Accelerated Program Information

For students with a B.S. in Ecology and Evolutionary Biology (EEB) from the University of Connecticut, the M.S. in Biodiversity and Conservation Biology is designed as an accelerated (fifth-year) M.S. degree; such students can apply 12 credits of graduate coursework required for the M.S. towards the B.S. as well. Students who have completed a B.S. in another program must complete course requirements equivalent to the undergraduate EEB major to earn this M.S. degree.
