

# DIVERSITY SCIENCE (GRADUATE CERTIFICATE)

---

The Diversity Science Certificate is offered by the Department of Psychological Sciences (<https://psychology.uconn.edu/graduate/>) and aims to facilitate student learning and engagement with diversity science in the field of psychology and beyond. After completing this certificate, students will be prepared to engage with an increasingly diverse society, apply a critical equity-minded lens to their own research, and to discuss and consider social dynamics related to diversity as they progress in academia and beyond. Plans of study for the certificate, including substituting electives and whether or not to complete a research project for the certificate, must be approved in advance by the certificate director.

Students must complete 12 credits.

Course	Title	Credits
Required Course		
PSYC 5170	Current Topics in Psychology	3
Required Electives (Select nine credits)		
PSYC 5441	Language Modality, Neural Plasticity, and Development	3
PSYC 5445/ COGS 5140	Neurobiology of Language: Typical and Atypical Cognition and Language Development	3
PSYC 6750	The Social Psychology of Stigma	3
PSYC 6771	Intergroup Relations	3
PSYC 6782	Cross-Cultural Psychology	3

Alternatively, in place of one elective, students may take PSYC 5800 and complete an independent research project related to diversity science.
