DEGREE PROGRAMS

Master's degree programs are offered in a broad range of fields throughout the University. A master's degree program represents the equivalent of at least one year of full-time study beyond the baccalaureate level (or its equivalent). The Doctoral degree is the highest degree offered by the University. The program leading to its attainment is intended to give persons of outstanding ability the opportunity to become creative contributors in a scholarly field. Award of the degree testifies to broad mastery of an established subject area, acquisition of acceptable research skills, and a concentration of knowledge in a specific field.
